

# Squirrel Monthly Income Fund

31 January 2026

The Squirrel Monthly Income Fund ('Fund') seeks to generate competitive and regular income from a diversified portfolio of NZ loans secured by registered first mortgages on residential property. Squirrel focuses on mortgage lending to select market niches where investors can expect to earn attractive returns from carefully qualified borrowers with residential property as security.

## Performance and market commentary

The Squirrel Monthly Income Fund return for January was **0.43%**<sup>1</sup>, contributing to a 1-year of 6.51%<sup>1</sup>. Since inception, the Fund and its investors have not experienced a single negative month. The Fund offers investors competitive stable monthly income by providing flexible, competitive funding solutions for NZ's housing market.

The Fund's portfolio is diversified across **370 loans**, including **272 construction loans** and **98 home loans**. Its exposure is managed via the **Squirrel Wholesale Construction Loan Fund (73.79%)** and the **Squirrel Wholesale Home Loan Fund (25.49%)**, with **0.72% held in cash**. The portfolio's **Loan-to-Value Ratio (LVR)** remains conservative at **55.29%**.

At month-end, the Fund was invested in **three home loans \$918,869 or 1.69%** that are either over-term and/ or in arrears, or both. Since month-end, **two over-term loans (\$886,546 of fractional investment or 1.63%)** are expected to be repaid in full in February or March. **One loan's (\$32,232 of fractional investment or 0.06%)** arrears are expected to be cleared in March.

The Fund is invested in **14 construction loans (totalling \$6,719,633 and 4.71%)** that are either over-term and/ or in arrears, or both. Since month-end, **three loans (\$1,453,610 of fractional investment or 1.02%)** have since been repaid. Another **ten loans (\$4,876,109 of fractional investment or 3.42%)** are expected to be repaid during February or March, with the remaining **one loan (\$389,913 of fractional investment or 0.27%)** expected to be repaid through property sales during the first quarter of 2026.

According to Cotality<sup>2</sup>, while new borrowers and existing mortgage holders are benefiting from lower interest rates, "a cautious attitude persists, especially as the recovering economy has yet to improve job security and employment levels." In Cotality's view, the market seems to be an equilibrium point where buyers are "not in a rush to bid prices up", while vendors aren't generally having to drop their expectations much either. ANZ<sup>3</sup> are of a similar view, having cut their property price inflation expectation for 2026 from 5% to 2%. Against this macro-economic backdrop, at Squirrel, we continue to see demand for financing from property developers and builders who are planning new projects, where they have identified opportunities to undertake profitable developments.
